ODAKGIS

What Is OdakMobil?

An innovative mobile application that simplifies location-based data management and supports spatial analysis.

It integrates with geographic information systems, enabling users to view, analyze and share spatial data effectively.

Supports quick field decisions, improves efficiency and enables instant access to location data.

boosting institutional efficiency and enabling instant access to required location data.

Statistical and graphical analysis supports data-driven decision-making.

The Mobile Solution for Geographic Data

Key Benefits

- Save time with instant access to geographic data.
- Visualize and analyze geographic data to support decisions; improve the experience with location sharing, directions and coordinate entry.
- Simplify field data management and optimize workflows.

ODAKGIS

Key Outcomes

- Centralize and organize geographic data for easy access.
- Optimize fieldwork and improve staff effectiveness.
- Support data-driven strategic planning with statistical and graphical presentations.
- Keep data secure through authorization and access controls.

ODAKGIS

USERS

Public Institutions and Agencies

Municipalities Energy, Drinking Water and Wastewater

Companies

External Institutions and Organizations

Citizens

ODAKGIS

BENEFITS

- GIS integration centralizes spatial data and simplifies access.
- Up-to-date location and map data support uninterrupted operations.
- Spatial analysis and layer-based review accelerate strategic, data-driven planning.
- Easy field access to location data improves workflows and operational efficiency.
- An intuitive interface supports users without specialist technical knowledge.
- Show, hide, manage and analyze institutional map layers.
- Detailed attribute filters provide quick, accurate access to required data.
- Go directly to coordinates for detailed map inspection.
- Bookmark locations and add notes to track personal or institutional map information.
- Graphical and statistical analysis strengthen data management and strategic decisions.

ODAKGIS

SYSTEM FEATURES

Flexible architecture supporting new technologies

Open-source architecture

iOS and Android compatible

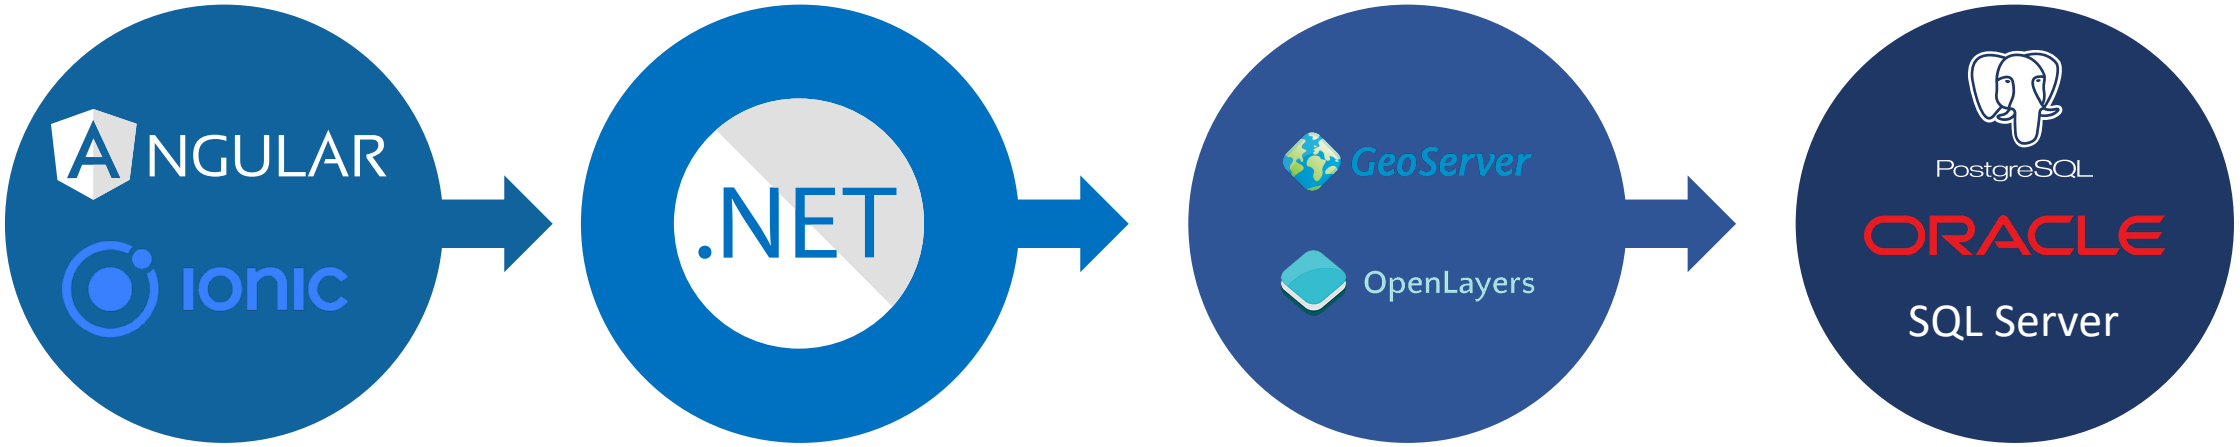

Integrates with e-government systems (TAKBIS, MERNIS, VEDOP)

Integrated with the TKGM Parcel Query service

Fast data queries, map rendering and efficient resource use

MAPPING CAPABILITIES

Layer and Data Management

- Show, hide and manage data layers
- View data integrated with GIS
- Run detailed attribute-based analysis and queries

Measurement and Analysis Tools

- Measure lengths and areas precisely
- Create buffer zones around selected areas
- Evaluate spatial data through graphical and statistical analysis
- Support decisions with detailed map visualizations

Location and Navigation

- Access and focus on your current location
- Search by coordinates and navigate to a destination
- Get directions and find the best route
- Share locations for instant data transfer

Interaction and Personalization

- Bookmark and organize important locations
- Record field information as notes
- Query information at selected map points

ODAKGIS

SYSTEM OVERVIEW

6 View feature details, get directions to a selected feature, and add notes and attachments.

5 Display the entered coordinates on the map.

4 Measure area and length on the map.

View defined layers and adjust visibility and transparency. 1

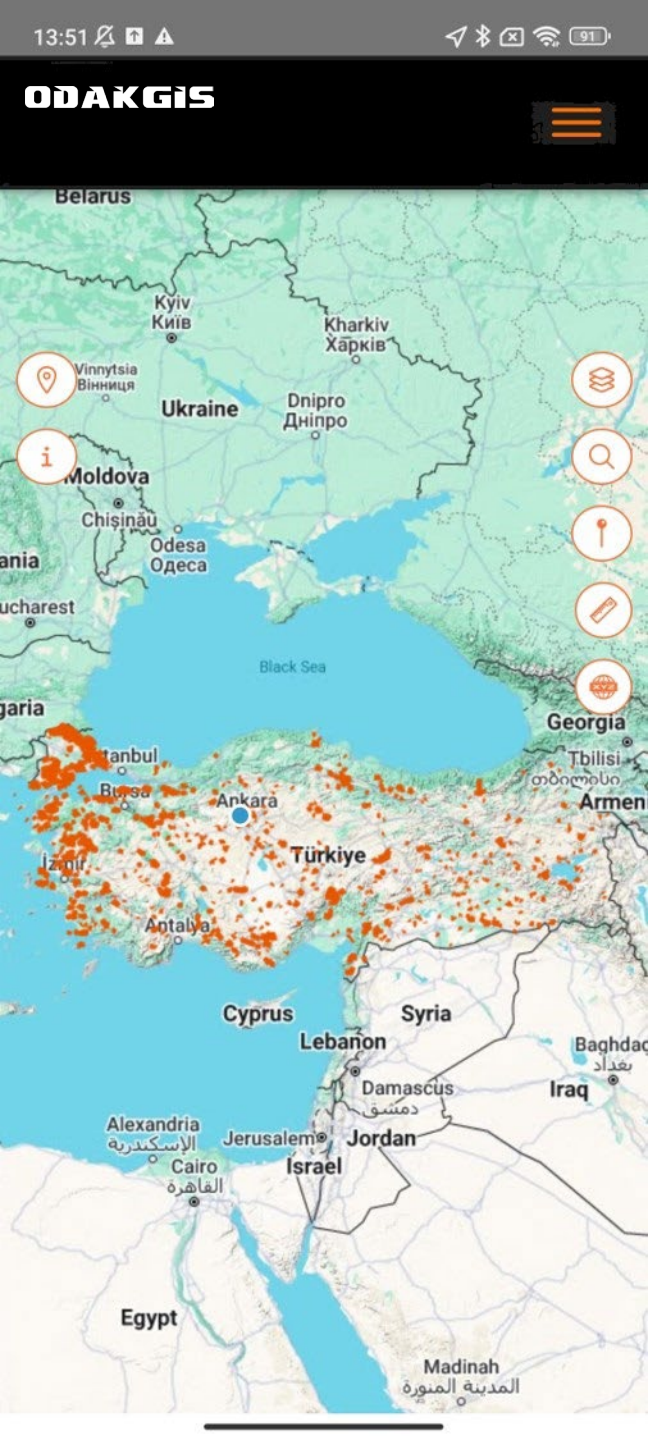

Query by layer attributes or specified criteria. 2

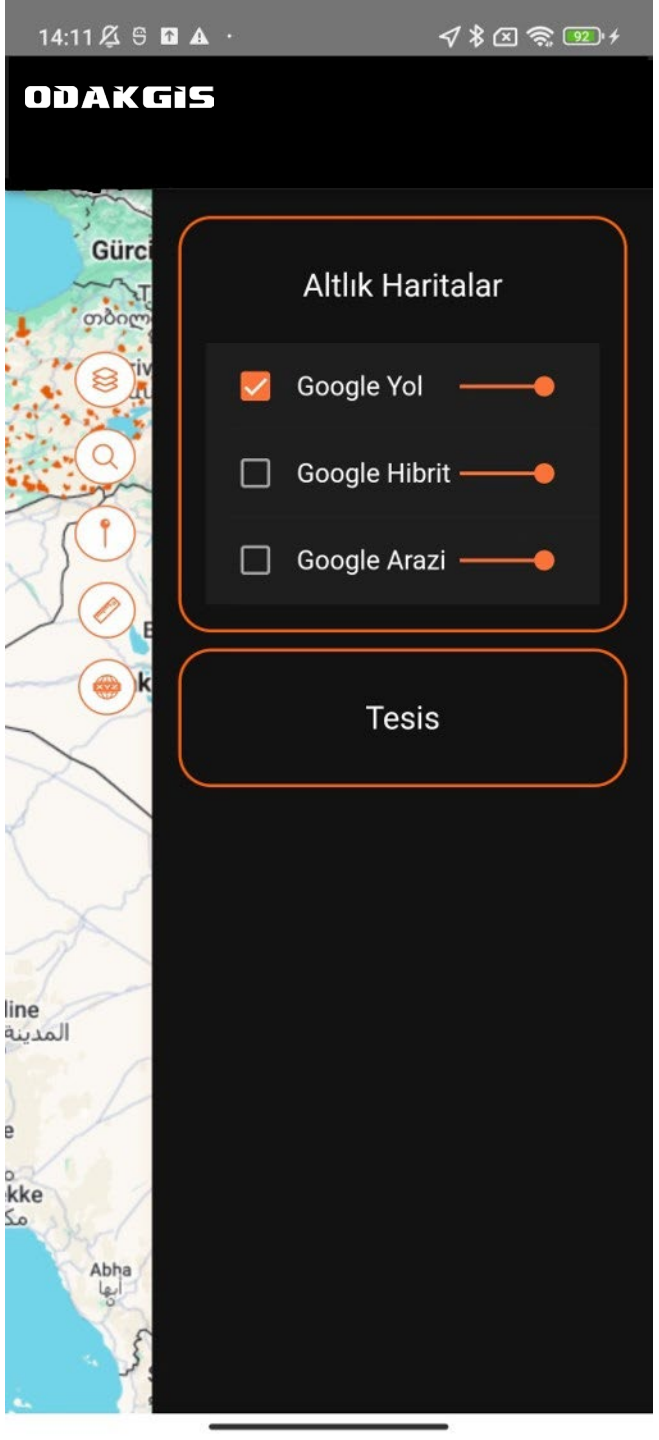

Share a selected location, get directions, add notes and query parcels where integration is available. 3
